

Feedback

I was embarrassed by my problem and silently suffered for many years. I had tried to manage the problem myself but I think that I had just made things harder for myself. I decided to take action and seek help from Dr Crover at G.P.S.

Although I didn't have much faith in this to start, it started to turn things around for me. I have made tremendous progress by just changing the way I think. I feel liberated and pleased to go back home (UK) without any panic attack or anxiety. I cannot thank my doctor enough for helping me lead a normal life again. Thanks a lot Dr Crover. Don't suffer, seek help.
